

Environmental Comparison

Go Green
Cold Patch

Other
Asphalt

1. Lowest harmful emissions

Lowest VOCs

No hazardous pollutants

No heated asphalt fumes

No kerosene or diesel fumes

No manufacturing plant emissions

2. Lowest life-cycle energy inputs

No quarrying, transportation,

and crushing of rock

No refining or heating of virgin asphalt

Produced at ambient temperature

without combustion

3. Highest post-consumer recycled content

asphalt: 100% recycled

aggregate: 100% recycled

4. 100% recyclable
